About the course and the Department: The course Animal Science is basically a Biotechnological Intervention in Zoology with a holistic approach of Life Sciences.

The development of biological sciences leads to the up gradation of general lifestyle of animal and mankind. Technological intervention on the biological sciences is growing rapidly. This is the need of the time to focus on the holistic approach of life sciences, especially to animal studies for the sustainability of animal as well as human. The environmental factors and physiological response should be monitored very closely for an overall understanding of the subject and society. Since the inception in the year 2016, the mission of the department to provide an in-depth exposure to the students in the emerging field of animal science with an overview of life sciences and subsequently prepare them to be leaders in the field of research and development in academia and industry with a vision of societal sustainability. In whole eastern India, Kazi Nazrul University is the only university which is providing the course in Animal Science. **The syllabus is oriented with National Level Merit Examinations.**
