ABOUT KAZI NAZRUL UNIVERSITY

Situated in the Damodar River valley, historically enveloped amidst a setting of coal mines and industries in the city of Asansol, Kazi Nazrul University has been envisioned as more than a source of general education for building careers in Humanities, General Science, Commerce and Law. Heeding the policy need for embedding tertiary education within local contexts and conditions for development, the University has recently introduced two engineering departments in Mining and Metallurgy with opportunities of hands-on training in the vicinity. The abiding ideal of this University is to contribute to the economic, social, intellectual and cultural development of the country through the pursuit of excellence in teaching and learning and other creative-academic endeavours such as seminars, symposia, training in various service schemes, progressive research initiatives and comprehensive outreach programmes.
